DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 20 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Specifically claim 20 lacks the proper preamble necessary for a statutory article/computer claim which claims a computer-readable signal bearing media. See MPEP 2100 for guidance on article/signal related inventions.

Allowable Subject Matter

3. Claims 1-19 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: Prior art fails to suggest or render obvious a method for designating one or more tones as interruptible as claimed.
